about

I'm an intermediate-level Front-End Developer with a solid foundation in web development technologies such as React, Vue and pure JavaScript. I'm always looking for challenges where I can use my skills and experiences to develop innovative software solutions and improve the user experience.

software developer

Passionate about delivering high-quality software. I'm passionate about delivering high-quality software through the full software development life-cycle. I believe in creating software that is not only functional but also user-friendly and efficient. I'm committed to learning a broad range of skills to meet the requirements of any project.

Expertise in Scrum methodology. I have experience in converting requirements and major features into a Scrum backlog. I'm skilled in implementing continuous integration and deployment, and quickly releasing work in an enterprise environment.

Problem-solving skills. I excel at troubleshooting and problem solving, including technical and non-technical problems. I have used these talents to support production environments, debug complex technical bugs, and identify innovative technical solutions.

education

2021
UDEMY
The Web Developer Bootcamp

2021
Freecodecamp
Responsive Web Design

2018
Universidad Arturo Michelena
Licenciatura en Psicología, Mención Clínica

work experience

Grupo Priver c.a.
June 2022 – Present.

Co-founder / Front-End Developer

Code applications in HTML, CSS, JS and TS using frameworks like Vue.js, React.js, Nuxt.js, Next.js sometimes without any framework, and Tailwind css. Implementation of firebase, google APIs, own APIs, third party APIs and web scraping. Restful APIs, GraphQl, websockets. Continuous integration of testing through cypress. An important amount of projects directed and coded: CRUD, Dashboards, Maps services, landing pages, admin panels, analytics. Dockerization of projects, deployment & supervision.

Scalebot
December 2021

Front-End Developer

Code applications in HTML, CSS and PHP with the use of Laravel and Bootstrap frameworks. Design, develop and code web applications for customers, this includes debugging issues and identifying solutions. Design and develop of wireframe & user experience in most projects.

skills
